• IR-CAST 2C

Highly Accurate Two Color Online Infrared Non-Contact Pyrometer with Rectangular FOV for Casting Applications

IR-CAST 2C is a highly accurate digital two colour Rectangular measuring field IR pyrometer for non contact temperature measurement specially used in foundries for molten metal. The Pyrometer measures the temperature of an object by calculating the ratio of the energies at two different wavelength bands. The ratio technique eliminates and reduces errors in temperature measurement caused by factors such as dust, vapour or smoke etc.

If the target is within this rectangular area, it gives an accurate temperature reading even when liquid moves within this area.

Software "Infrasoft"

AST "Infrasoft " software is under standard scope of supply.It offers possibilities of connecting three pyrometers simultaneously for parameter setting, view real time graph, offline graph and to evaluate measuring data. Communication between the pyrometer and the software is implemented via a cable connected between the pyrometer and the PC serial port. It comes with record feature, spot size calculator and parameter settings features.

Some of the parameters adjustable via software are

- Emissivity, Response Time
- Clear Time(Peak Picker)
- Analog Output
- Sub Range,
- Unit Of Temperature(°C/°F)
- Communication mode(Comm.mode)
